MIFTAHUL ARIF

DIGITAL SOLUTIONS • WEB APPLICATIONS • BUSINESS PROCESS AUTOMATION

Surabaya, Indonesia | +62 89510579739 | arief1911@gmail.com | miftahularif.vercel.app

PROFESSIONAL SUMMARY

Creative and self-directed digital professional transitioning from graphic design, digital marketing, and administrative operations into web-based digital solutions. Started with HTML, CSS, and JavaScript and expanded through hands-on, AI-assisted development to build a practical employee reporting application. Strongest at understanding real-world workflows, translating them into clear application requirements, and using modern tools to turn repetitive processes into structured digital workflows.

CORE SKILLS

Web Development	HTML, CSS, JavaScript, responsive UI, forms, CRUD applications
Application & Data	Supabase, PostgreSQL, relational data concepts, authentication, Row Level Security (RLS)
Automation	Business process automation, reporting workflows, document generation, workflow design
AI-Assisted Development	Using AI as a development assistant for implementation, debugging, iteration, and documentation
Tools	Git/GitHub, Vercel, Cloudinary, docx.js, Excel, Canva, Adobe Photoshop, Illustrator, Premiere, After Effects
Creative & Marketing	Graphic design, branding, digital content, social media, promotional materials

SELECTED TECHNICAL PROJECT

Employee Activity & Attendance Reporting System — *Personal / Administrative Application | 2026*

- Built a web application to replace a manual monthly activity and attendance reporting workflow with structured digital submission and review.
- Implemented employee login, monthly reports, activity and attendance records, photo uploads, admin dashboard, submit/review, and Approve / Revision workflow.
- Used HTML, CSS, JavaScript, Supabase Auth/PostgreSQL, Row Level Security (RLS), Cloudinary, and docx.js for automated Word report generation.
- Designed the workflow from the operational process and used AI-assisted development to help translate requirements into working application code, iterate, debug, and document the system.
